

SPLICE STRANDS

FE-SPSTR1/4

Open Wire Splices are used for mid-span splicing during new construction and for repair of abraded or severed wire at tie points. Provides armoring at the tie that is designed to protect the conductor from damaging effects of chafing and fretting. Open Wire Splices wrap on easily by hand without a need for wire cutting. They are designed to permanently restore the full mechanical strength and conductivity of the conductor to which they are applied. Size is 1/4" x 35". Number of subsets is 2. Weight per 100: 70 lbs. Material is galvanized steel.
