

## Acrylate peeler pliers TB-330

Brand / model	HRTX TB-330	
Application scope	3.1 x 2.0mm indoor cable	
Fiber diameter	125 $\mu$ m	
Casing diameter	250 $\mu$ m	
Fiber core count	1-2	
Cutting material	Metal core	
Use temperature	- 20 ~ + 45 $^{\circ}$ c	

1. Make sure the front end of the optical cable is cut straight
2. Insert the rubber-insulated optical cable inward straight into the front of the pliers
3. Thread the front end of the rubber-insulated optical cable into the desired distance
4. Grasp the handle of the plier firmly and cut the exterior sheath and the interior intensified cable core of the rubber-insulated optical cable straight
5. Do not let go of the grip on the pliers while pulling out the rubber-insulated optical cable in a straight motion, so that the stripping is accomplished
6. Take the cut-off sheath of the rubber-insulated optical cable at the end of the plier
